EXPERIENCE

Performance Marketing Executive 2025 — Present
Groww Guruu · Jaipur / Hybrid

- Own the full paid acquisition stack for a high-ticket personal-brand coaching account — lead-gen campaigns on Meta (FB + IG), retargeting layers, and creative testing pipeline.
- Hit a portfolio-best **7.52% CTR** on retargeting (22-12-25) and a **13.15% CTR / ₹34.29 CPL** on the FML-OG-CAMPAIGN TOF creative. Lifted 7-day rolling ROAS from 2.8× to 4.2× in 4 weeks by reworking the retargeting frequency cap and LAL refresh cadence.
- Built a spend-weighted reporting dashboard in Looker Studio — kills 1 in 5 ad sets every Friday based on 7-day rolling CPA drift, not a vibes-based review.
- Implemented Meta Pixel + CAPI dedup, fixed a 14% attribution-leak that was under-reporting lead volume, recovered ~₹1.8L/month of credit on retargeting.

Freelance Performance Marketer — E-commerce 2025 — Present
Independent · D2C brands (INR)

- Run purchase-optimised Meta Ads campaigns for 2 e-commerce stores — built the largest single-campaign spend on record: **₹29.13L** in **MSXSK Sales Campaign 9.2.26** with **2,301 purchases**.
- End-to-end creative testing: shipped 24-variant hook × format matrices on MSXSK, scaled only the top 3. Testimonial-led video won **71%** of head-to-head tests.
- Drove a client from ₹0 to ₹1.4L/month Meta revenue in 90 days (Agrika Khatri 2) with a TOF prospecting + retargeting + LAL stack.
